

## ABSTRACT

Compounds having the structure  $\text{MgX}^1\text{X}^2$ , wherein  $\text{X}^1$  is parecoxib anion and  $\text{X}^2$  is as selected from the group consisting of parecoxib anion, chloride, bromide, sulfate, phosphate, nitrate, acetate, propionate, succinate, glycolate, stearate, lactate, malate, tartrate, citrate, ascorbate, glutamate, benzoate, salicylate, methanesulfonate, and toluenesulfonate are disclosed.
